

# CREATING A SOFT STRIPE USING SHIVA OIL STICKS

The background of fabric scrap book page below was created in the following way.

1. Tape a piece of fabric to your work surface.
2. To make a pattern for the stripe, take a piece of paper and tear the long side to create an uneven edge.
3. Lay the paper parallel to one end of your fabric. Leave about 2cm of fabric exposed.
4. Rub the paintstik on the edge of the paper and pull the colour from the paper onto the fabric using your thumb.
5. Move the paper over about 3cm to reveal an unpainted section of fabric.
6. Rub the colour onto the paper and continue until the piece is completely painted.  
You may change colours each time or leave some unpainted area between the stripes. Let dry for 24 hours and then iron to set.
