

SCREEN PRINTING

CUT PAPER STENCIL

- Draw an image on the Ezy cut stencil paper. Allow for a margin of 5cm between the image and the side of the screen
- Using a stencil knife and cutting matt, cut your drawn image out to create a stencil
- Tape the edges of your screen so there is no mesh showing between the paper stencil and the screen frame
- Tape the stencil to the underside of the frame to hold in place
- Place ink along edge of screen and gently flood the screen
- Place screen down onto paper or fabric and pull the squeegee towards you across the image evenly applying firm pressure
- Lift your screen and re flood the screen.
